

How to Use Human Digital Twins as a Part of a Personal Digital Identity for Web 2 and Web 3?

Mathieu PERCIE DU SERT, Guillaume COURSIN
tOOiin, Sèvres, France

Abstract:

We will present our vision of the future of digital identities in the web 3, metavers and in the web 2. We will explain how tooiin has started its transformation from a body scanner R&D company to become a startup specialized in digital identities, and why and how we want to develop a plateform compliant with all 3D Body Scanners.
